CONCLUSION 27

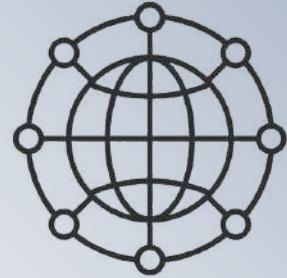

INTRODUCTION

NexCoin Investments™ is a next-generation crypto investment management platform that combines AI-driven trading algorithms, arbitrage engines, and risk-optimized portfolio management. Built by a team of experts in blockchain, trading infrastructure, and fund management, NexCoin Investments™ bridges the gap between institutional-grade strategies and retail accessibility. The platform enables investors to gain exposure to crypto markets with reduced risk, enhanced transparency, and superior returns.

Crypto markets are fast-paced, volatile, and complex. While opportunities for profit are vast, most retail and institutional investors lack access to enterprise-grade trading tools. NexCoin Investments™ provides an automated, algorithmic trading ecosystem that simplifies access to advanced crypto trading strategies while ensuring compliance and transparency.

NexCoin Investments™ is a pioneering force in the digital asset space, founded on the principle of bridging the gap between traditional finance and the decentralized world of cryptocurrency. Our mission is to democratize access to high-yield investment strategies typically reserved for institutional investors, leveraging a sophisticated trading system to generate substantial returns. This whitepaper serves as a comprehensive guide to the NexCoin™ ecosystem, detailing the utility of our native token, the strategic roadmap, and the robust architecture designed to foster a new era of financial freedom.

THE NEXCOIN™ ECOSYSTEM

ECOSYSTEM

The Nexcoin™ ecosystem is a holistic platform designed to provide a seamless and rewarding experience for our users. Key components include:

NexBank™

NexCard™

NexCoin™ Trading System

NexCoin™ Terminal Mobile Application

NEXBANK™

A foundational element of our platform, the Crypto Bank facilitates easy on-ramp and off-ramp services, allowing users to effortlessly convert between fiat and cryptocurrencies.

Benefits:

- Multi-Currency Accounts
- Cross-Border Payments
- Spend Crypto Easily
- 25+ Global Fiat Currencies
- Secure Crypto Deposits
- Wallet Integration
- Individual & Corporate Accounts
- DeFi + TradFi Bridge
- Rewards & Loyalty Benefits
- Global Scalability

NEXCARD™

NexCard™ is the world's first patent-pending crypto gift card designed to bridge the \$500B+ global gift card market with the fast-growing cryptocurrency ecosystem of over 400M users. By combining the familiarity of prepaid cards with the innovation of blockchain technology, NexCard™ makes it simple, secure, and compliant to gift cryptocurrency at scale.

Benefits:

- Crypto + Fiat Flexibility
- Physical & Digital Options
- Instant Redemption / Escrow Security
- Retail & Corporate Reach
- Universal Gifting Appeal
- Built-in Commerce Utility
- Revenue Stream for Ecosystem
- Scalability & Global Reach
- Brand Trust & Innovation
- Reward & Incentive Friendly

NEXCOIN™ TRADING SYSTEM

It is a revolutionary Investment Platform that uses sophisticated trading powered by AI to generate high ROI for the investors. It is a combination of AI and technical indicators. It combines market sentiments and technical indicator alerts to feed buy and sell signals to our order book engine.

NEXCOIN™ TERMINAL MOBILE APP

A central hub for community engagement, the mobile app features mini-games and interactive elements that allow users to earn free \$NEXC tokens, further integrating them into the ecosystem.

THE \$NEXC TOKEN

The \$NEXC token is the official utility token of the NexcoinTM ecosystem, meticulously designed to provide significant value and benefits to its holders like higher returns, and access to a full suite of crypto banking services.

The platform's native token, \$NEXC, is a key component of this ecosystem. It provides holders with benefits like fee discounts, access to premium strategies, staking rewards, and governance rights, empowering users to actively participate in the platform's growth and decision-making.

UTILITY

\$NEXC holders will have wide range of benefits, including but not limited to:

TIERED ROI

Token holders receive higher returns on investment (ROI) compared to non-token-holding investors. The more you hold, the more you earn.

FEE DISCOUNTS

Use \$NEXC to pay for transactions and services within our NexBankTM and get significant discounts on fees.

PLAY TO EARN TOKENS

Create an account on the NexcoinTM Terminal mobile app and earn free \$NEXC tokens by playing fun mini-games.

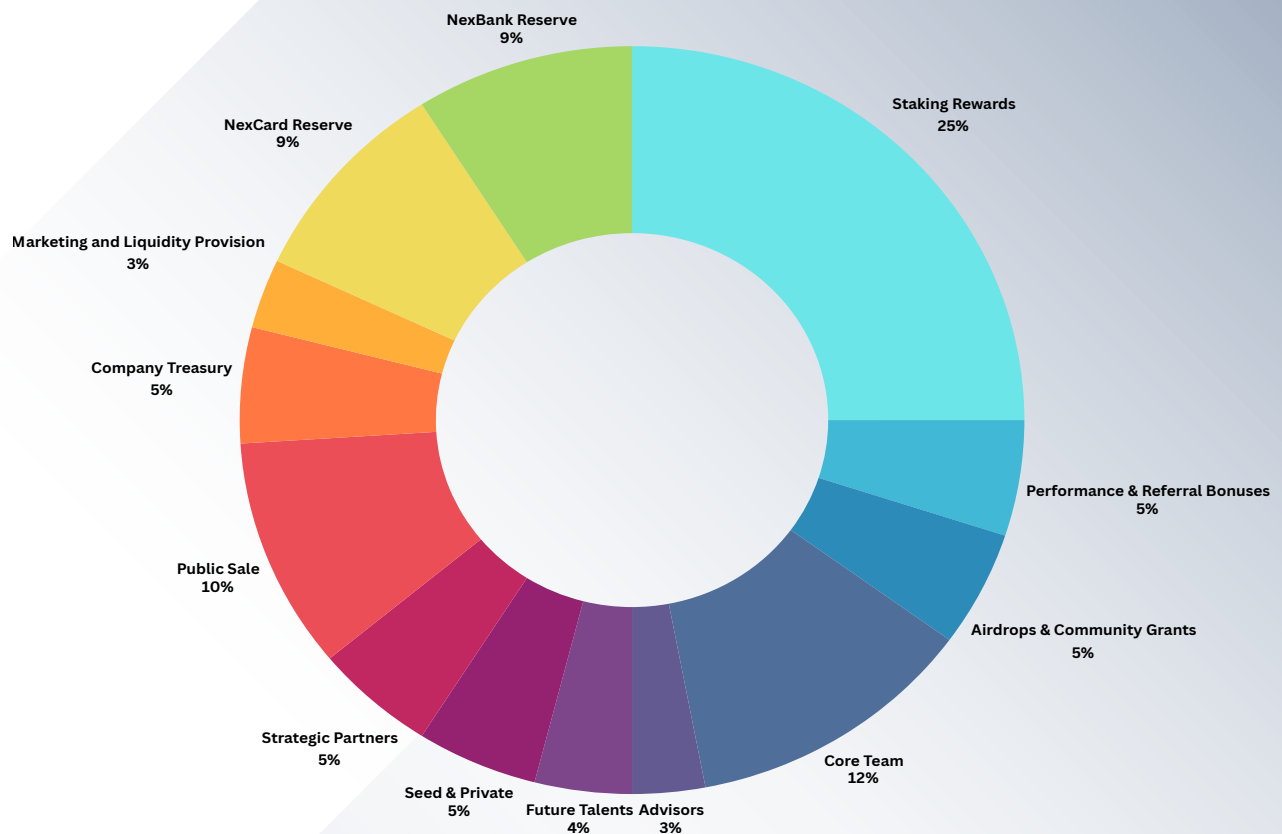

TOKENOMICS

Below is the detailed breakdown of the token distribution for \$NEXC, with each major category divided into specific sub-categories and their respective percentages. The total supply remains at 1 billion.

KEY FEATURES

- ▶ **Token Symbol:** NEXC
- ▶ **Total Supply:** 1,000,000,000 NEXC
- ▶ **Tokens Unlock at TGE:** 100,000,000 NEXC
- ▶ **Total Emission Schedule:** 48 Months
- ▶ **Network:** Solana
- ▶ **Total Distribution Groups:** 10

TOKEN DISTRIBUTION MODEL

1. Ecosystem and Community (35%)

This is the largest allocation, designed to drive user adoption and engagement.

- **Staking Rewards (25%):** Allocated to reward users who stake their \$NEXC tokens. This directly supports the platform's utility and provides a consistent incentive for long-term holding.
- **Performance & Referral Bonuses (5%):** Used for rewarding users who achieve specific investment fund performance milestones or refer new users, driving active participation and growth.

- **Airdrops & Community Grants (5%):** A strategic reserve for one-time airdrops to bootstrap the initial user base and for providing grants to developers or community members who contribute to the NexCoinTM ecosystem.

2. Team, Advisors, and Future Hires (19%)

This allocation ensures the long-term commitment and professional growth of the project.

- **Core Team (12%):** Reserved for the founding team members, Rami, Fahad, and the three founding members. These tokens will have a vesting schedule (e.g., 1-year cliff, 3-year linear vesting).
- **Advisors (3%):** Dedicated to legal, financial, and exchange partnership advisors, with a similar vesting schedule to ensure their continued support and guidance.
- **Future Talent (4%):** A strategic reserve for attracting and compensating future hires as the company expands its operations and requires specialized talent.

3. Investors (10%)

This category is for the early financial backers of the project.

- **Seed & Private Sale Investors (5%):** Allocated to the initial investors who provided critical capital. Their tokens will have a vesting schedule (e.g., a 6-month cliff, 18-24 month linear vesting) to prevent market volatility.
- **Strategic Partners (5%):** A smaller allocation for investors or partners who bring significant value beyond capital, such as key industry connections or technology.

4. Public Sale (10%)

This is the only category with an immediate unlock, providing initial market liquidity.

- **Public Sale:** A straightforward allocation for the public to acquire tokens, ensuring a wide and decentralized initial distribution.

5. Treasury and Operational Reserve (26%)

This serves as the project's long-term operational and financial backbone.

- **Company Treasury (5%):** A non-vested reserve for ongoing operational expenses, legal fees, audits, and compliance costs.
- **Marketing & Liquidity Provision (3%):** A dedicated fund for post-listing marketing, exchange liquidity, and ensuring a healthy trading environment.
- **NexBank™ Reserve (9%):** A specific reserve for the development and future operational needs of the NexBank™ service, showing a forward-looking plan for the project's evolution.
- **NexCard™ Reserve (9%):** A specific reserve for the development and future operational needs of the NexCard™ service, showing a forward-looking plan for the project's evolution.

TOKEN VESTING SCHEDULE

Below is a detailed explanation of the vesting schedule (Token Unlocks) for each sub-category of token distribution, designed to provide a comprehensive overview for the investors and the potential centralized exchanges.

1. Ecosystem and Community (35%)

- **Staking Rewards (25%):** Tokens in this sub-category have no cliff and will be unlocked gradually over a period of 4 years. The release is tied to an "emissions schedule" which means a set number of tokens will be released on a regular basis (Monthly) to reward users who stake their \$NEXC tokens. This ensures a consistent supply to incentivize network participation and is not subject to a single unlock event.
- **Performance & Referral Bonuses (5%):** Similar to staking rewards, these tokens have no cliff and will be unlocked over 4 years, based on the growth and performance of the platform. This is a dynamic schedule that rewards active users and is not a fixed, time-based release.
- **Airdrops & Community Grants (5%):** This is a flexible, uncapped release. Tokens are distributed as needed for specific marketing events, airdrops to new users, or grants to community developers. This allows for adaptability in your growth strategy.

2. Team, Advisors, and Future Hires (19%)

- **Core Team (12%):** These tokens are subject to a 1-year cliff. This means none of the tokens will be unlocked for the first year after the Token Generation Event (TGE). After the 1-year cliff, the tokens will be unlocked on a monthly basis over the next 3 years. This 4-year total vesting period is a standard practice that demonstrates a strong long-term commitment from the founding team.
- **Advisors (3%):** The vesting schedule for advisors is the same as the core team: a 1-year cliff followed by a 3-year monthly linear unlock. This ensures their ongoing involvement and alignment with the project's success.
- **Future Talent (4%):** This reserve is also subject to the same vesting schedule to ensure new hires are similarly incentivized for long-term commitment.

3. Investors (10%)

- **Seed & Private Sale (5%):** These tokens have a 6-month cliff, meaning they cannot be sold for the first six months. After the cliff, they will be unlocked on a monthly basis over the next 18 months, resulting in a total vesting period of 2 years. This is crucial for preventing a large sell-off immediately after the token's listing.
- **Strategic Partners (5%):** The vesting schedule for strategic partners is identical to that of seed and private sale investors to ensure their interests are similarly aligned with market stability.

4. Public Sale (10%)

- **Public Sale (10%):** All tokens in this category will be 100% unlocked at the Token Generation Event (TGE). This provides immediate liquidity for trading on the CEX and ensures that the public has a fair and open opportunity to participate from day one.

5. Treasury and Operational Reserve (26%)

- **Company Treasury (5%):** Tokens in this reserve have no vesting schedule and are unlocked as needed for operational costs. However, CEXs often require these funds to be held in a multi-signature wallet to demonstrate good governance and transparency.
- **Marketing & Liquidity Provision (3%):** These tokens are also unlocked as needed to provide liquidity to exchanges and fund ongoing marketing efforts.
- **NexBankTM Reserve (9%):** This is a non-vested reserve that can be used for the development and future operations of the NexBankTM service.
- **NexCardTM Reserve (9%):** This is a non-vested reserve that can be used for the development and future operations of the NexCardTM service.

LINEAR VESTING GROUPS

Groups that Unlock linearly after a cliff.

Category	Sub-Category	Allocation	Cliff Period	Vesting Period
Ecosystem & Community	Staking Rewards	25%	No Cliff	4 years (based on emissions schedule)
	Performance & Referral Bonuses	5%	No Cliff	4 years (based on emissions schedule)
	Airdrops & Community Grants	5%	No Cliff	4 years (based on emissions schedule)
Team, Advisors, & Future Hires	Core Team	12%	1 Year	3 Years (monthly unlock)
	Advisors	3%	1 Year	3 Years (monthly unlock)
	Future Talent	4%	1 Year	3 Years (monthly unlock)
Investors	Seed & Private Sale	5%	6 Months	18 Months (monthly unlock)
	Strategic Partners	5%	6 Months	18 Months (monthly unlock)
Treasury & Operational Reserve	Company Treasury	5%	No Cliff	Unlocked as needed
	Marketing & Liquidity Provision	3%	No Cliff	Unlocked as needed
	NexBank™ Reserve	9%	No Cliff	Unlocked as needed
	NexCard™ Reserve	9%	No Cliff	Unlocked as needed

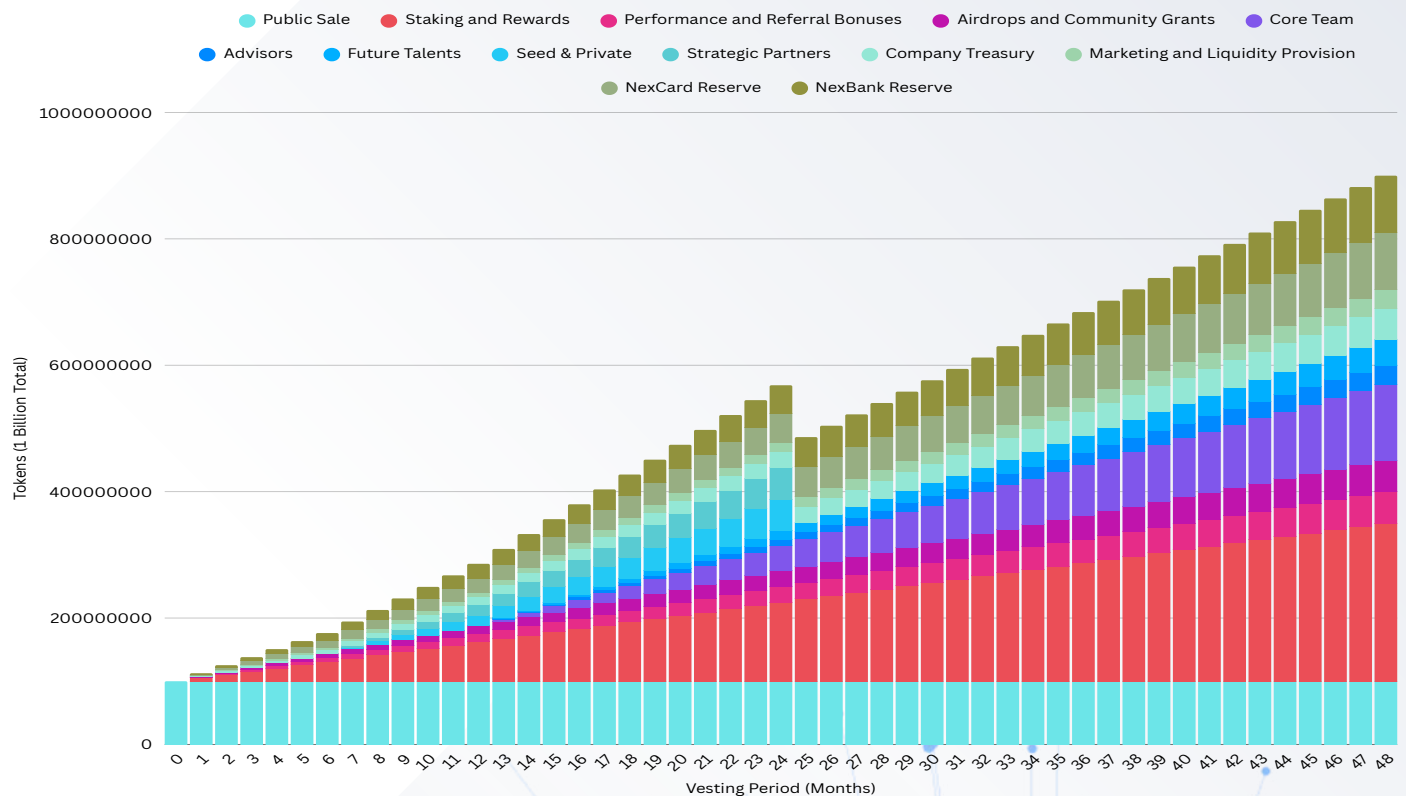

FULL INITIAL UNLOCK GROUPS

Groups that Unlock 100% at Token Generation Event TGE.

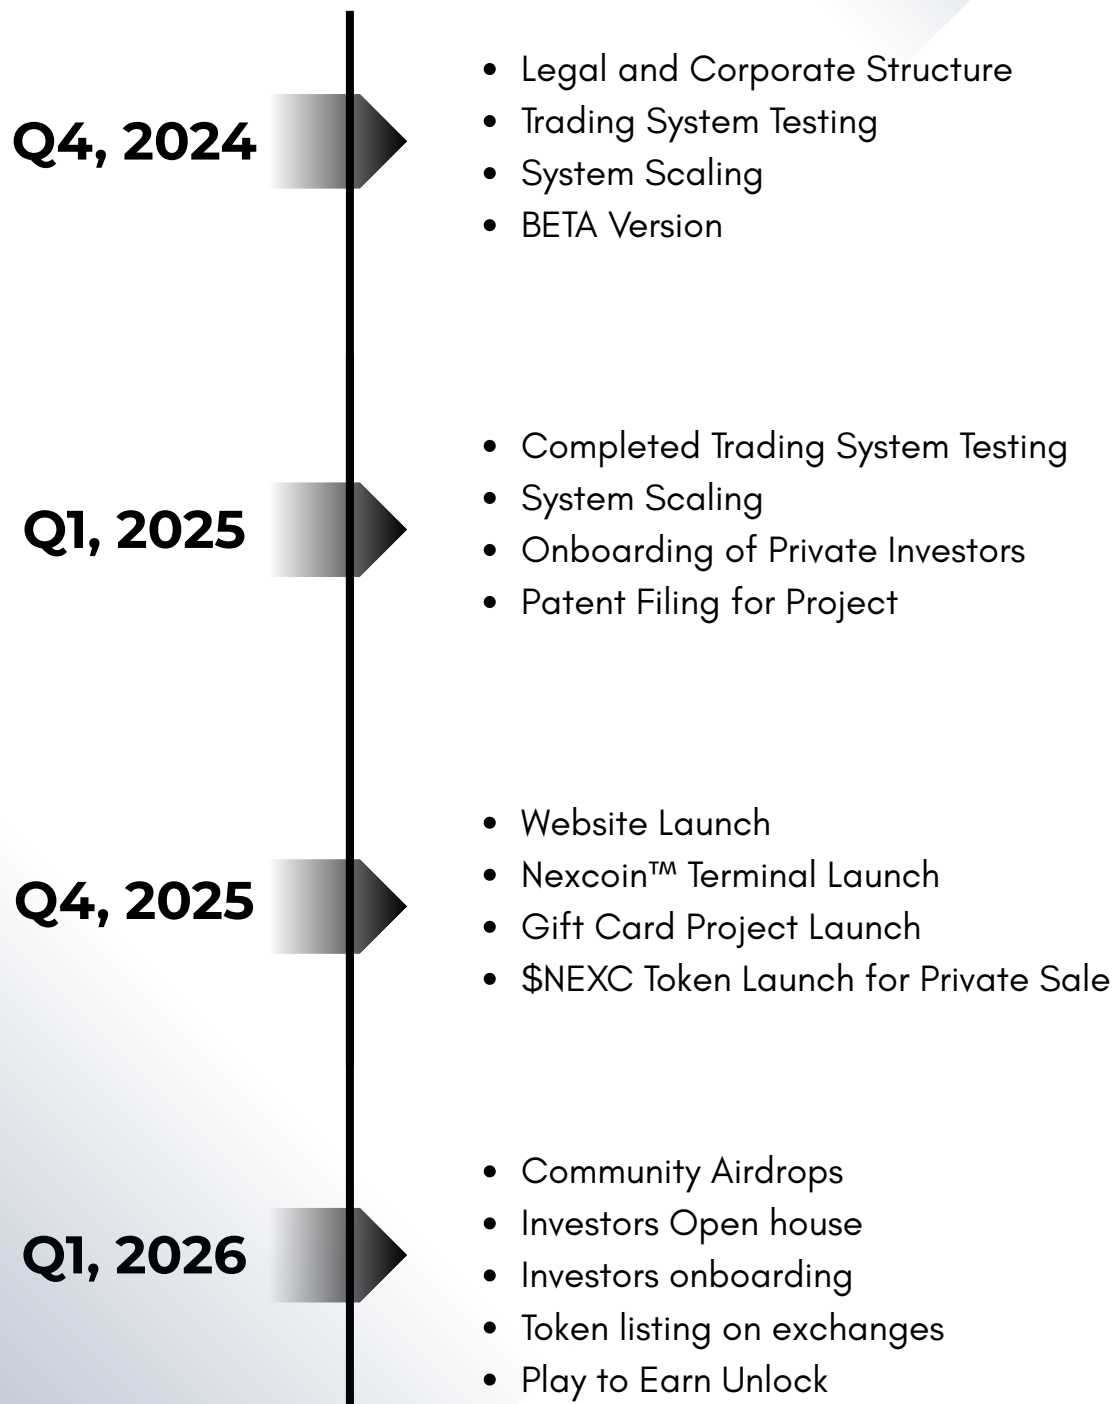

Category	Sub-Category	Allocation	Cliff Period	Vesting Period
Public Sale	Public Sale	10%	No Cliff	100% Unlocked at Launch

VESTING PERIOD AND TOKEN SUPPLY

ROADMAP

Q3, 2026

- NexBank™ Launch
- Services unlock for NexCard™ (Gift Card) Project
- Public launch of Trading System

Q1, 2027

- API First Trading System Launch
- Subscription model for Rent a Bot Model
